Helstons

Motorcycle stories

Founded in Paris at the end of the 1980s in a modest garment workshop by a young Kamal Kabi (who defines himself today as a “leather artisan”) and his father, and driven by an overwhelming passion for mechanical engineering, the Helstons brand almost immediately devoted itself to creating equipment for those who love distinctive machines.

Its prolific designer brought together his childhood friends to work on this project, and this combination of a family-owned enterprise, enduring friendships, and artisanal expertise became the cornerstone of the company’s success.

With a desire to work every day using a fine material such as leather (Kamal’s favorite material), Helstons naturally began producing beautifully burnished patched jackets.

This eventually led the brand to become THE gold standard in Vintage & Custom style, which became widely popular. Through a collection progressively expanded into gloves, denim trousers, shoes, and helmets, these truly authentic designs were directly inspired by the history and culture of international motorcycle style. This is most likely what led to its great popularity in lands as far away as South Korea or Japan, nowhere near its French homeland.

Our designs, which are valued just as much for their quality as for their durability, are now worn behind the controls and in everyday life, due to their unique, bold style, anywhere gorgeous machines hit the road.

The brand has matured and clearly focused on the future, and reach into new market segments and approach inspired by fashion a

Helstons couldn’t resist the community on new adventures, within urban jungle of our modern-day or into distant deserts. Our goal is comfortable, protective, and without sacrificing our essential ambition is to keep writing and Stories: your very own.

Wearing a Helstons jacket or helmet of the “devil” inside.

This Workbook seeks to help you discover beautifully enhance your sales floor and its purpose is to be an effective, practical
